MEDIA PLAYER

ENERGIZE  
YOUR MUSIC™

you crank...

...it rocks!™

music movies radio photos recorder ~~power~~

EP-MX72

Want to keep up to date whilst on the move? No problem with the Eco Media Player™ - it even includes a quality stereo FM radio - and you can record your favourite shows to enjoy later.

With built-in photo album support you can take your cherished pictures around with you - and even set up a slide-show, zoom in and pan around.

OK, so you've got a long bus ride ahead? Why not load up a few novels to read on the super clear text display - you can even save a bookmark so you can pick up where you left off... ...and if you prefer someone else to read for you, audio books from **AUDIBLE®** are supported.

...and if your mobile phone dies, Eco Media Player™ can crank it up for that vital call.

Enjoy all your media, anytime, anyplace!

Integrated Mobile Phone Charger	✓
Built-in Torch	✓
High efficiency 3-phase power generator	✓ 40 mins play for 1 min crank
Works with	Windows XP, Vista, MAC OSX, Linux

Seventeen years ago English inventor Mr Trevor Baylis invented the world's first clockwork radio.

He invented it to aid education in remote areas and third-world countries like Africa, where power grids are often unavailable.

*"Today, sustainable energy is vital for all of us and the BAYLIS corporation have developed this amazing state-of-the-art Multi Media Player that energises your favourite tunes (and movies) wherever you go, whenever you go.*

*Welcome to the next generation!"*

The Eco Media Player™ is a feature-rich device of the highest standard.

Its power-free system is complimented by the latest digital audio technology.

Personally energise this amazing little pocket device, and it will reward you with 24-bit Hi Fidelity playback of all the major music formats including Apple® AAC, Microsoft® WMA, mp3, and OGG Vorbis.

Organise your Playlists as you wish, by Favourites / Artists / Albums / Genre etc.

That's not all... Your little pocket eco friend will even record any stereo Hi-Fi input (Now, where did you put your old Vinyl collection!), and you can connect any type of microphone to use this device as a broadcast quality audio recorder (Journo's, your roaming reporting will never be the same again!).

Movie playback supports MP4 (H.264) and Windows® WMV formats, for superb, glitch-free personal enjoyment of all those great music-vids and feature films.

The internal 4Gb or 8Gb memory can hold around 2,000 or 4,000 songs respectively - and if that's not enough, there's an SD card slot too!

\* "APPLE", "MAC OSX", "Microsoft Windows", are Trade Marks, or Registered Marks of their respective owners, and are used here for reference purposes only.
